Brian;

It's amazing how much data there is to look over. I need to refresh my memory of the site since it's been on hold for quite a while. A map would be helpful and I'm wondering if any of the maps from the old RI/FS report that Klienfelder prepared would be useful? I'm available for the phone call with enough notice to block out some time for the call. Should be lots of fun.

Sincerely;

Subject: Falcon RI/FS Sampling Plan

Good afternoon

I am working on scheduling the sampling to complete the RI/FS for the Falcon Refinery Superfund Site and would like your input. Due to the amount of available funds to complete the RI/FS, I am reviewing the data provided by the PRP and the proposed sampling to determine the priority and necessity of additional sampling. I would like to set up a conference call in the next two weeks to go over the sampling and EPA's recommendations based on reviewing the data. Attached are spreadsheets containing all of the data collected by the PRP and the data (subject to revision) that exceeded a risk based number by AOC/media and media for all the data. I am in the process of confirming that the correct screening values were used.

Thanks

Brian W Mueller RPM
